

Closed-Circuit Television(CCTV)

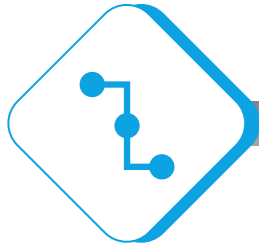

What is Closed-Circuit Television(CCTV)?

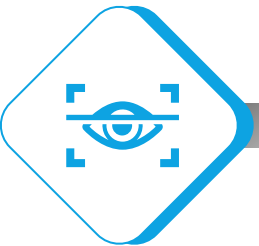

CCTV is a closed surveillance system where cameras securely transmit video to managed storage and monitoring networks

Designed for public and enterprise security, CCTV solutions help deter crime, monitor activities, and provide reliable evidence.

Requires robust telecom infrastructure, ensuring stable connectivity, remote viewing, and high-quality video storage.

Extensively deployed across homes, offices, institutions, and smart-city projects for surveillance and security

CCTV for Business

Why does your business need CCTV (1/2)

1

Enhances Security & Prevents Losses

- CCTV provides 24×7 monitoring to deter theft, vandalism, and unauthorized access
- Continuous recording helps identify incidents quickly and reduces business risks

2

Boosts Operational Efficiency & Accountability

- Cameras help track on-site activities, employee workflow, and customer movement
- Improves productivity, ensures compliance, and provides evidence for dispute resolution

CCTV for Business

Why does your business need CCTV (2/2)

3

Remote Monitoring with BSNL Connectivity

- BSNL's reliable network enables live viewing of CCTV feeds from any location
- Helps business owners stay informed and respond quickly to on-ground situations

4

Strengthens Safety & Compliance Standards

- CCTV supports adherence to safety protocols in workplaces, warehouses, and retail spaces
- Provides verified documentation required for audits, insurance claims, and legal compliance

Why BSNL CCTV?

Government-backed, reliable network ensuring secure and stable CCTV transmission.

Scalable high-bandwidth options supporting smooth **HD/4K surveillance** for any setup.

End-to-end managed CCTV solution with installation, equipment, and technical support.

Nationwide coverage, enabling deployment even in remote areas.

BSNL Offers CCTV Options Tailored to Your Business Needs

IP-Based CCTV Solutions

High-resolution IP cameras with scalable multi-camera support

Secure video transmission over BSNL's reliable broadband/ILL network

Protect businesses from theft and fraud by monitoring in multiple scenarios.

Services are user-friendly, with easy-to-follow setup guides and installation options.

Cloud CCTV Storage & Monitoring

Offsite cloud storage ensures footage safety even during on-site failures

Accessible playback and live view from anywhere with BSNL connectivity

Automated data backup with customizable retention periods

Reduces on-premise hardware costs and simplifies maintenance

Managed CCTV Services (End-to-End)

BSNL helps ensure that your CCTV setup adheres to local data protection and privacy laws.

24x7 monitoring and proactive maintenance by BSNL technical teams

BSNL offers reliable customer service and technical support for setup and post-installation issues.

Ideal for enterprises, campuses, retail chains, and government sites
